

Final Project Peer Review

On a scale 1-5, rate the participation of each of your teammates:

- 1) Benjamin Hernandez: 5
- 2) Alex Santiago: 5
- 3) Xianghui Xie: 5

Rate and describe your contribution to this project:

- Rating: 5
- I contributed to both Task 2 (PWM driver) and Task 4 (AXI CDMA integration). While Benjamin took the lead in starting these sections, I was responsible for finishing the implementation, debugging issues (such as CDMA errors and timer integration), and ensuring complete functionality of audio playback through the PWM output. I also verified and tested the full system to ensure correct DMA-driven audio playback under different Pong events. My work ensured that the AXI CDMA was legally and effectively used to control the PWM driver.
